¿What is MATLAB?

MATLAB stands for matrix laboratory
    It easily handle with Matrices and arrays of data

MATLAB integrates its own language (High level and interpreted)
    Easy to understand and also to learn
    Some similarities in the notation with Fortran
    Some similarities in the structures with C, C++
    Integrates object oriented programming and use it in many of its own applications

MATLAB will assist (newbies) with:
    Wizards
    Tools
    An excellent **help guide**

¿What is MATLAB?

Exercises

First 8 exercises

Extra exercise downloadable from the virtual campus
